MATERIAL INFORMATION

Dear Sir,

As required under the material information disclosure provisions of the Listing Rules, this is to inform you that one of the WAPDA's Auto Transformer T-3: 500/ 200 KV/ 450 MVA at Guddu (the Transformer) caught fire on January 21, 2016. Resultantly, the Transformer went out of operation and thus impacted power evacuation in the region where Engro Powergen Qadirpur Limited (EPQL) Plant operates. EPQL Plant is under standby mode since then due to the load evacuation issue. Initially, it was estimated that the Transformer will be repaired/replaced within a month of the incident, however as per latest information available from WAPDA, the work on the Transformer is still in progress and may take longer.

Meanwhile the Company/EPQL will continue to be entitled to full Capacity Purchase Payment (CPP) as the Plant is available for dispatch to the power purchaser. We will keep the exchange informed of any further substantive events if and when these take place.

You are requested to kindly inform the members of your exchange accordingly.

Very truly yours,

Faryal Mazhar Habib
Company Secretary
